RENEWED PETITION UNDER 37 C.F.R. § 1.47(a)

Mail Stop Petition

Randolph Building

Alexandria, VA 22314

Sir:

Pursuant to 37 C.F.R. § 1.47(a), Applicants petition to proceed with the prosecution of the above-identified application, which names Jiunn-Liang KO, Yu-Lu HUANG, Tzu-Chih CHEN, Hsu-Wei HUNG, Ho-Lung JIANG, Ching-Lung HU, Cheng-Chun KUAN, and Hsuan-Ju THOU, in the name of Jiunn-Liang KO, Yu-Lu HUANG, Ho-Lung JIANG, Tzu-Chih CHEN, and Hsuan-Ju THOU.

The Applicants' petition dated April 2, 2007 was dismissed on August 24, 2007 for the following reasons:

- (1) Chen's declaration does not appear to be a statement of first hand knowledge;
- (2) A complete copy of the application papers was not sent to each of nonsigning inventors;
and

02/25/2008 H0000035 000750 10572563

02 FC:1464 130.00 DA

- (3) An English translation of an attachment was not submitted.

Applicants re-submit a petition with Exhibits 1-6 satisfying the requirements of 37 C.F.R. § 1.47(a).

(1) Each of the declarants has first hand knowledge on the matters stated in the declaration.

Mr. Tzu-Chih CHEN has personally communicated with each of the four nonsigning inventors, i.e., Hsu-Wei HUNG, Ho-Lung JIANG, Ching-Lung HU and Cheng-Chun KUAN. Based on his first hand knowledge, Mr. Chen states in his declaration (Exhibit 1) that he personally knows that a letter was mailed to each of the nonsigning inventors along with copies of a reply sheet, the patent specification, a declaration and power of attorney, and an assignment. Only Mr. Jiang responded to Mr. Chen's letter.

Mr. David Ko assisted Mr. Chen and the other inventors, particularly in delivering documents relating to the patent application and communicating with the nonsigning inventors. Based on his first hand knowledge, Mr. Ko states in his declaration (Exhibit 2) that he has made diligent efforts to contact the nonsigning inventors on behalf of Applicants. The communication history since July 26, 2006 is summarized in Exhibit 2.

(2) A physical copy of the specification including claims was delivered to the nonsigning inventors.

A letter entitled "Notice" (Exhibit 3-1) was mailed on December 3, 2007 to each of the four nonsigning inventors along with a reply sheet (Exhibit 3-2), a declaration and power of attorney (Exhibit 3-3), an assignment (Exhibit 3-4) and the patent specification (Exhibit 3-5). As shown in Mr. Ko's declaration (Exhibit 2, paragraph 7) and Notice (Exhibit 3-1), a complete copy of the application papers was sent to the inventors pursuant to MPEP 409.03(d). In addition to Mr. Ko's declaration and letter, a mailing receipt (Exhibit 4-1) and its English translation (Exhibit 4-2) evidence the actual delivery of the copy to the nonsigning inventors.

Mr. Ko received an executed declaration and assignment from Ho-Lung JIANG after the mailing. Thus, Mr. Jiang now becomes a signing inventor. A copy of each document from Mr. Jiang is attached hereto as Exhibit 5-1 (executed declaration) and Exhibit 5-2 (executed assignment).

Not receiving any response from the remaining nonsigning inventors, Mr. Ko emailed and called each of them on behalf of Applicants (see Exhibit 2, paragraph 9). As summarized in the attached Phone Record (Exhibit 6), the three nonsigning inventors expressly showed their intention to refuse to sign the declaration and assignment relating to the present patent application. In addition to Exhibit 6, Mr. Ko states in his declaration that the inventors stated that they are unwilling to sign the documents (see Exhibit 2, paragraphs 9-12).

(3) A Non-English exhibit

An English translation of the Chinese mailing receipt (Exhibit 4) is prepared and submitted herein.

CONCLUSION

First, a complete copy of the application papers including the patent specification was delivered to the last known address of the nonsigning inventors (see Exhibits 3-5 and 4-2).

Second, Applicants' diligent effort to contact them is demonstrated by the two declarations (see Exhibits 1 and 2) which were prepared based on the declarants' first hand knowledge. In response, Hsu-Wei HUNG, Ching-Lung HU and Cheng-Chun KUAN made clear that they would not sign the declaration and assignment relating to the present patent application (see Exhibits 2, 6 and 7).

Last, an English translation of the Chinese mailing receipt (Exhibit 4) is submitted.

These circumstances satisfy the requirements under 37 C.F.R. § 1.47(a). Therefore, Applicants respectfully submit that this petition is in allowable condition.

Petition is hereby made for extension of time of four (4) months. Authorization is hereby given to charge \$950 to Deposit Account No. **08-0750** to cover the fee for the extension and the Petition fee. The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 08-0750 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

HARNESS, DICKEY & PIERCE, P.L.C.

FUNGAL IMMUNOMODULATORY PROTEIN (FIP) PREPARED BY

MICROORGANISMS AND USES THEREOF

BACKGROUND OF THE INVENTION

Field of the Invention

[0001] The invention relates to an improved nucleic acid molecule encoding fungal immunomodulatory protein (FIP) that is better expressed in fungi, to vectors comprising the nucleic acid molecule, to hosts transformed with said vectors, to processes of expressing the protein of the invention in said transformed hosts, to the protein of the invention produced by said processes, to uses of said hosts comprising the protein of the invention and to a process of purifying FIP. The protein of the invention has wide immunomodulatory activity. Thus, the present invention further relates to uses of the protein of the invention in cosmetic or pharmaceutical compositions and to food or feed additives comprising the protein of the invention. Finally, the invention relates to the method of modulating immunological activities by orally administering FIP or proteins fused with FIP to a subject.

Description of the Prior Art

[0002] Lectins from Fungal fruit bodies or mycelia have immunomodulatory and hepatoprotective effects that have been suggested to be able to remove free radicals (Lin J.M. et al., *Am J Chin Med.* 1993;21(1):59-69). (L)-galactoside-specific lectins from mistletoe enhance cytokine production *in vitro* and *in vivo* (Gabijs H.J. et al., *Anticancer Res.* 1992 May-Jun;12(3):669-75). In a test using Balb/C mouse as the disease model, lectins and recombinant lectins can inhibit tumor formation (Couraud P.O. et al., *J. Biol. Chem.* 1989; 264:1310-1316).

[0003] Ganoderma is a rare and valuable herb in Chinese medicine. It has been known in China for over 5,000 years as "Ling Zhi". There are a variety of ganodenmas, including *G. lucidum* (red), *G. applanatum* (brown), *G. tsugae* (red), *G. sinense* (black), and *G. oregonense* (dark brown).

[0004] Several proteins from edible fungi such as *Ganoderma Lucidium* (Ling zhi or Reishi), *Volvariella Volvacea* (Chinese Mushroom), *Flammulina Velutipes* (Golden needle mushroom) share similar amino acid sequences and immunomodulatory functions. These proteins were named fungal immunomodulatory proteins (FIPs) (Ko J.L., *Eur. J. Biochem.* 1995; 228:224-249). Among all health foods in Chinese medicine, Ling Zhi is the best-studied fungus.

[0005] It has been known that Ling Zhi has anti-allergy (Chen H.Y et al., *J. Med. Mycol.* 1992; 33:505-512), hepatoprotective (Lin J.M. et al., *Am J Chin Med.* 1993;21(1):59-69), anti-tumor effects (Wasser SP(1999), *Crit Rev*
